LLM Agents Assignment

Modify the **Weather Agent** you created so it can answer the prompt:

"Should I carry an umbrella tomorrow"

1. You must use the LLM as the planning, reasoning and action (ReAct) agent for the above.
2. If the location is not mentioned in the prompt, the chatbot should prompt the user to specify the location
3. Demonstrate using streamlit UI

Submission:

1) Python code or notebook
2) Screenshot of the prompt with the response

Tips:

You can use the chatbot_with_context.py code from promptengineering folder to make your chatbot context/history aware.
